### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims 1 to 9 drawn to an invention nonelected with traverse in the reply filed on October 24, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 112, 1<sup>st</sup> Paragraph***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 10 to 12, 14 and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

I. Claim 10 recites, "A soft magnetic powder comprising a plurality of compound magnetic particles comprising a plurality of metal particles" (emphasis added by the Examiner). This language encompasses the embodiment wherein "a plurality of metal particles" are joined together to form "compound magnetic particles" which in turn are joined together to form the claimed "soft magnetic

Art Unit: 1793

powder". That is, each of the claimed "soft magnetic powder" particles is made up of the "a plurality of compound magnetic particles" and each of these "plurality of compound magnetic particles" is made up of "a plurality of metal particles". There is no support in the application as filed for such an embodiment, therefore claims 10 to 12, 14 and 15 are directed to new matter. Applicants' have cited paragraph [0028] of the specification as support for this new claim language. The Examiner does not agree. Paragraph [0028] of the specification is directed to the composition of the "metal magnetic particles". Paragraph [0028] does refer to Figure 1, however Figure 1 is directed to the shaped body (paragraphs [0024] and [0027]) and not the powder as now recited in amended claim 10.

***Claim Rejections - 35 USC § 112, 2<sup>nd</sup> Paragraph***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 10 to 12, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I. Claim 10 recites, "A soft magnetic powder comprising a plurality of compound magnetic particles comprising a plurality of metal particles" (emphasis added by the Examiner). It is not clear whether this language is limited to the embodiment wherein "a plurality of metal particles" are joined together to form

“compound magnetic particles” which in turn are joined together to form the claimed “soft magnetic powder”. Or does the claim term, “powder” mean a collection of but not joined together “compound magnetic particles” wherein the “compound magnetic particles” are each made up of joined together “metal magnetic particles”?

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
